# STALK MARKET AND PLANET+ PRODUCTS

## SUSTAINABILITY BY DESIGN

Items within Inno-Pak's Stalk Market Compostable Products and Planet+ lines are designed for sustainability. Most of these products are made from:

- ◆ Paper
- ◆ Other plant fibers
- ◆ PLA, a plant-based material that eliminates the need for petroleum-based plastic
- ◆ A combination of these materials

The use of these materials enables most Stalk Market and Planet+ products to be commercially compostable. After use, commercially compostable products can be industrially composted and turned into nutrient-rich compost.

## DIVERT WASTE FROM LANDFILLS TO COMPOSTING FACILITIES

Inno-Pak is committed to providing you with safe, innovative single use packaging that is eco-friendly. Stalk Market and Planet+ take out the guesswork of waste diversion by offering BPI-certified and CMA-accepted compostable packaging. These products:

- ◆ Are easy to divert away from landfills
- ◆ Demonstrate your commitment to the environment
- ◆ Help you achieve your waste diversion goals

Commercially compostable products are vital part of the solution when it comes to waste diversion and sustainability. Make a difference for the environment with Stalk Market and Planet+ Compostable Products.

## BUILD YOUR BRAND'S ECO-VALUE

Sustainability is a key factor in many customers' buying decisions, especially younger generations that are increasing their purchasing power. However, they often don't know what to look for. Using Stalk Market and Planet+ products helps you:

- ◆ Demonstrate your brand's commitment to the environment
- ◆ Build support with eco-conscious consumers
- ◆ Create peace of mind with certifications of key claims from leading nonprofits

Sustainability is quickly becoming a way that brands can not only win over customers but also differentiate themselves from their competitors.

## GROW YOUR BUSINESS WITH STALK MARKET AND PLANET+

## WINNING AT WASTE DIVERSION

### WHY WINNING AT FOOD WASTE DIVERSION IS IMPORTANT

Packaging and containers, including food containers, make up about a fourth of the waste in our country's landfills, according to the US EPA. To make matters worse, food contact often makes food packaging ineligible to be recycled.

Commercially compostable packaging is an opportunity to give a second life to food packaging that would otherwise end up in landfills as part of the waste stream.

### COMMERCIALLY COMPOSTABLE PACKAGING A PLAN FOR DIVERSION

- ◆ Diverts waste away from landfills and towards nutrient rich compost
- ◆ Can replace packaging made with traditional plastic
- ◆ Provides carbon sequestration and reduces methane emissions in the atmosphere
- ◆ Helps aid reforestation, wetlands restoration, and habitat revitalization

# COMPOSTABLE INNOBOX EDGE™

StalkMarket  
COMPOSTABLE PRODUCTS

## GET A SUSTAINABLE EDGE ON THE COMPETITION

- ◆ **COMMERCIALY COMPOSTABLE:** BPI-certified and CMA-accepted commercially compostable (*Where facilities exist*)
- ◆ **SUSTAINABLY MADE:** Made from 100% recycled paperboard, including at least 95% post-consumer content (PCR)
- ◆ **SECURE CLOSURE:** Patented reverse lock secures food (*US Patent No. D777,029*)
- ◆ **STREAMLINED EATING:** Patented tear-away flaps improve the dining experience (*US Patent No. D876,951*)
- ◆ **LEAK PROTECTION:** Inner PLA lining and inside corner folds protect against leaks yet maintain compostability

# WHY CHOOSE THE INNOBOX EDGE?

## INNOBOX EDGE ADVANTAGE

Inside corner folds set the INNOBOX EDGE apart from other cartons.

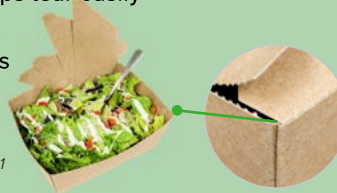

- ◆ Creates a streamlined edge
- ◆ Strengthens corners
- ◆ Protects against leaks

## TEAR-AWAY FLAPS

Turn the INNOBOX EDGE into a food tray in four easy tears.

- ◆ Perforated flaps tear easily
- ◆ Removing the flaps improves the customer experience

US Patent Nos. D876,951

## SECURE CLOSURE

The Reverse Lock Closure\* keeps the INNOBOX EDGE closed and prevents spills and messes when in transit.

US Patent Nos. D777,029

# HERE'S THE DIRT ON COMMERCIAL COMPOSTING

## GOOD FOR THE EARTH

According to the Biodegradable Products Institute, "composting is a natural process that turns organic materials into a valuable soil amendment."

Composting is vital to sustainability efforts. It diverts organic waste away from landfills and turns them into a product that can help the environment.

## BENEFITS OF COMPOST

- ◆ Improves soil and water quality
- ◆ Can improve crop yields
- ◆ Can replace chemical fertilizers
- ◆ Reduces methane emissions
- ◆ Helps aid reforestation, wetlands restoration, and habitat revitalization
- ◆ Provides carbon sequestration.

## TYPES OF COMPOSTING

Commercial composting facilities accelerate the breakdown of organic materials, like those in our commercially compostable packaging.

The two most common types of commercial composting today are windrow and Aerated Static Pile. A third method uses in-vessel, positive aeration, membrane laminate technology.

# PLANET+ FOOD CONTAINERS
